
Meat Slicer Machine | Meat Dicing Machine

Meat slicer machine is applied to cut frozen meat into slice directly without defrosting process in advance.

Meat dicing machine is suitable for cutting fresh meat into diced meat in meat process for sausages, ham or meat ball products manufacturing. Minimum dicing size is 4mm.

Meat slicer and dicing machine are same to other meat process machines, like meat mincer, meat chopper, meat vacuum tumbler, meat mixer, sausage filler and smoker oven, they are all necessary machines in various meat process.

Meat Slicer Machine Technical Data

Power	Slicing Capacity	Slice Thickness	Dimension
3Kw	600-1200Kg/h	Adjustable	1300*645*1320mm

Meat Dicing Machine Technical Data

Power	Original Meat Size	Dimension
3Kw(1.5+1.5)	MAX 84*84*350mm	1350*800*950mm
